How it looks ?

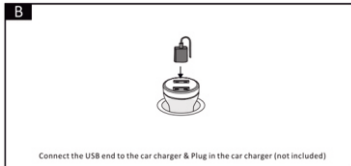

How to use the device?

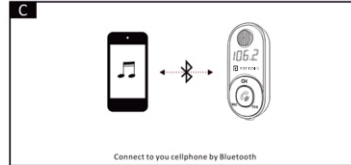

Usage of any device has the particular way and hence the correct guidelines help you to avail the optimum experience.

1. Find the suitable place in your dashboard to paste the hook, so that you can achieve the correct placing.

2. Plug in the USB end to the car charger to connect the device easily with your car audio system.

3. Connect your phone with the Bluetooth to listen your favorite music or to attend and make calls easily.

Instructions to setup the FM Transmitter Connection

At first, you should plug the unit into a 5V power source in your car.

Then, you need to tune into your radio to an unused FM frequency and match the same frequency on this device.

It is suggested that you should insert the TF card or USB disk that contains MP3/WMA files into that card slot. It helps in transmission, synchronization and in playing the file easily.

How to use Bluetooth ?

1. To use the Bluetooth of this device, it is mandate to pair your mobile phone with the unit.
2. Turn on your mobile Bluetooth and search new devices around. Once your phone detects this unit namely "Auto 17", it connects easily and do not ask for any password.
3. If there is a password requirement, please use the password "0000/1234".
4. While listening to any song, if there is an incoming call, the device instantly switches to the call mode or telephone mode without any manual intervention.
