

User Manual

# Specification:

Input:9V/3A 12V/3A Phone output:5W/7.5W/10W/15W Earphone output: 3W (max) Smart Watch output: 2.5W (max) Transmission distance: <6mm

#### Method Of Application:

Conversion rate:>73%

1. Plug the cable into the QC3.0/PD adapter and turn on the power.

2. Place the devices that support wireless charaing in the center of the product charging area and start charaina

# **Accessory List:**

3 in 1 Wireless Charger X 1 User manual X 1 USB to Type C Cable

# **Matters Needing Attention:**

1.Please use a qualified QC3.0/PD power adapter, otherwise it may cause unstable charaina.

2.Do not put metal debris or magnetic card on the product, it may cause damage to the product or abnormal charaina.

### Safety Instructions: 1.Do not pull the power supply hard, to avoid the

power cord break or fall off.

2.Do not disassemble the product or put it into fire or water to avoid short circuit and leakage.

3.Do not use the product in severe high temperature, humidity or corrosive environment, to avoid damage to the circuit and leakage phenomenon.

#### Safety Instructions:

1.Do not pull the power supply hard, to avoid the power cord break or fall off.

2.Do not disassemble the product or put it into fire or water to avoid short circuit and leakage

3.Do not use the product in severe high temperature. humidity or corrosive environment, to avoid damage to the circuit and leakage phenomenon.

#### FAQ:

# O1. The phone does not charge.

A: The phone is not aimed at the charging sensing area or the receiving coil is not installed correctly.

# Q2. Charaina fever.

A: It is normal for the receiving coil or transmitter to generate heat during wireless charging.

## O3. Mobile phone charging intermittently. A: The charging current of the PD power adapter is

insufficient or the voltage is unstable, please use a auglified adapter. A: The charging position is too bigsed, the

electromagnetic induction is not in place, and the charging position needs to be adjusted. O4. Slow charging.

A: The wireless charging current allowed by the mobile phone itself or the external receiving coil is different, or the standby power consumption of the mobile phone is large when charging, it is recommended to reduce the standby program of the mobile phone.

It is recommended to use 30watt head charger to enable fast charaina

#### Q5. Other questions.

A: Please contact after-sales customer service directly.
